

## FERC ENVIRONMENTAL SEMINAR MAY 25, 2017

The Federal Energy Regulatory Commission (FERC) is an independent federal regulatory agency that regulates the interstate transmission of natural gas and reviews proposals and issues permits to build pipelines, liquefied natural gas terminals and storage fields.

Join oil and gas industry stakeholders to learn about FERC and recent updates under the new administration. Obtain a comprehensive overview of the FERC process and how applications are prepared, evaluated and approved for pipelines and facilities. Additionally, construction and compliance requirements during the post authorization phase will be reviewed. Lastly, several industry case studies will highlight how projects can be completed successfully in partnership with FERC and applicable state agencies.

### PROGRAM

8:30 am – 9:00 am	Registration and Continental Breakfast
