

2013 Pipeline Erosion & Sedimentation Control Workshops

Tuesday, June 11

Thursday, June 27

Continuing Education Credits available!

The Pennsylvania Department of Environmental Protection and Marcellus Shale Coalition are pleased to offer to all oil and gas industry stakeholders and inspectors the opportunity to attend a workshop on Pipeline Erosion & Sedimentation Control Implementation and Maintenance.

This workshop will build on the requirements of the new ESCGP-2 permit which went live in January 2013. The primary focus is field implementation and maintenance of Erosion and Sedimentation (E&S) controls during pipeline construction.

PADEP representatives and industry will educate industry attendees on common issues with E&S controls installed in the field. In addition, industry attendees will have an opportunity to educate the PADEP on pipeline construction and other common field practices while navigating some of the challenging topography in Pennsylvania.
