

Pipeline Erosion & Sedimentation Control Workshop Wednesday, June 11, 2014

Continuing Education Credits available!

The Pennsylvania Department of Environmental Protection and Marcellus Shale Coalition are pleased to offer to all oil and gas industry stakeholders and inspectors the opportunity to attend a workshop on Pipeline Erosion & Sedimentation Control Implementation and Maintenance.

This workshop will build on the requirements of the field implementation and maintenance of Erosion and Sedimentation (E&S) controls and proper techniques for Slope Stability and Right-of-Way (ROW) restoration.

DEP and industry representatives will educate attendees on the challenges with implementing E&S controls, maintaining slope stability, and properly restoring ROW's in the field. In addition, attendees will have an opportunity to engage the DEP on pipeline construction and other common field practices while navigating some of the challenging topography in Pennsylvania.
