

Transportation Safety Day

Tuesday, March 31, 2015

Training Goal: Educate attendees regarding Pennsylvania's safety regulations and improve safe operating practices for drivers. Six individual breakout sessions will be presented by PennDOT, PA DEP, FTS International, USDOT/FMCSA and PA State Police (see reverse side for session descriptions).

Who should attend: Truck drivers, trucking company representatives, company safety coordinators or representatives, and anyone directly involved with the transportation component of natural gas development.

Agenda

7:30 - 8:00 am	Registration and Continental Breakfast
8:00 - 9:15 am	PennDOT: Special Hauling Permits, Trends in Injuries, and PA Oil and Gas Driving Incident Rates and Statistics
9:30 - 10:25 am	PA DEP: Hauling Residual Waste and Spill Response
10:40 - 11:55 am	FTS International: Best Practices Demonstration
12:00 - 12:45 pm	Lunch
1:00 - 2:15 pm	USDOT/FMCSA: CSA Score Evaluation
2:30 - 3:45 pm	PA State Police: Roadside Inspection
4:00 - 5:00 pm	PA State Police: Truck Inspection

Registration (per person) Deadline: March 26

\$175 Oil and Gas Industry Companies and Contractors

To register: www.transpsafetyday.eventbrite.com

Location

Stone Hedge Country Club
287 German Hill Road
Factoryville, PA 18419

Flagger Training Certification

Wednesday, April 1, 2015

Training Goal: This course is an instructor-led flagger train-the-trainer session conducted for individuals who can train personnel in their organizations who have flagging responsibilities on any road open to the public. This course is not related to escort vehicles, but instead for those individuals responsible for controlling and directing traffic on a temporary basis such as in a work zone. This course has been designed to meet the training requirements specified in PennDOT Publication 408, Section 901 - flagger training mandated for all flaggers in Pennsylvania. The course covers flagging procedures, work zone set-up requirements, flagger equipment and attire requirements, and traffic control devices based on information in PennDOT Publication 213—Temporary Traffic Control Guidelines, as well as the Manual on Uniform Traffic Control Devices (MUTCD). This course is required every three years.

Requirements: Pass a 20-question exam (70 percent is considered passing). MSC will provide copies of the presentations, handouts and quizzes for the training course. After course completion, a wallet card will be issued (valid for three years), as well as a CD with all training materials.

Who should attend: Supervisory individuals who train others within their organization.

Agenda

7:30 - 8:00 am	Registration and Continental Breakfast
8:00 am - 12:00 pm	Flagger Training

Registration (per person) Deadline: March 26

\$200 Oil and Gas Industry Companies and Contractors

To register: www.flaggertraining.eventbrite.com

Location

Stone Hedge Country Club
287 German Hill Road
Factoryville, PA 18419

Lodging

Hampton Inn Tunkhannock
209 East Tioga Street
Tunkhannock, PA 18657

The Hampton Inn is approximately 6.5 miles from the Stone Hedge Country Club. A block of rooms has been reserved at \$119 + tax. Please call 570-996-5866 and reference the Marcellus Shale Coalition (MSC) to make a reservation.

For more information and other training opportunities, please visit www.marcelluscoalition.org/get-involved or contact Sarah Smith, Events Manager, at ssmith@marcelluscoalition.org.

Transportation Safety Day Presentations

PA Department of Transportation (PennDOT): Special Hauling Permits, Trends in Injuries, and Pennsylvania Oil and Gas Driving Incident Rate and Statistics

Special hauling permits are required and issued for oversize and overweight loads using Pennsylvania's interstate highways, U.S. routes and other state highways. During this session, PennDOT will discuss the process by which these permits can be obtained and the penalties for violating their terms and conditions. Further, PennDOT will review the changes to oversize and overweight hauling regulations which were updated in 2014 (M938 Form). Next, PennDOT will provide an overview on the posted and bonded roads program. Lastly, PennDOT will present recent trends in injuries associated with transportation over a variety of different industries with a focus on oil and gas driving incident rates in Pennsylvania.

*Presented by Halley Cole, P.E., Chief, Pavement Management Unit
George Harpster, Central Permit Office Supervisor, Pennsylvania Department of Transportation*

PA Department of Environmental Protection (PA DEP): Hauling Residual Waste and Spill Response

The PA DEP regulates all defined wastes and spills within the oil and gas industry. This session will provide information on what truckers are required to display for hauling different industry wastes, specifically residual wastes. In addition, the PA DEP will review the proper spill response requirements; including, planning, containment, mitigation and cleanup protocols.

Presented Pennsylvania Department of Environmental Protection

FTS International: Best Practices Demonstration

FTS International is one of the largest well completion service companies in the United States and they recently adopted a technology to improve driver behavior and increase fleet safety. FTS will provide an overview on this technology and then review a recent case study they completed which resulted in a significant reduction of costs due to accident claims

Presented Jason Neatrou, Senior DOT Compliance Specialist, FTS International Services

US Department of Transportation: Federal Motor Carrier Safety Administration (FMCSA) CSA Program

Compliance, Safety, Accountability (CSA) is an FMCSA program designed to educate motor carriers and drivers, with attention from FMCSA and state partners, about potential safety problems with an ultimate goal of achieving a greater reduction in large truck and bus crashes, injuries, and fatalities. CSA identifies behaviors associated with safety risk; focuses compliance, enforcement, and remediation efforts on those unsafe behaviors. This session will provide an overview of the CSA scores and how they affect your business and insurance premiums. It will also offer simple solutions on how to improve your CSA Score and more importantly, why it is important to operate safely every day.

Presented by Timothy Cotter, Pennsylvania Division Administrator, FMCSA

PA State Police: Roadside Inspection

During part one of this two-part breakout session, Pennsylvania State Police motor carrier enforcement personnel will discuss safety regulations with particular emphasis placed upon the most common violations found during roadside inspections of trucks supporting gas drilling operations. Hours of service rules and other regulations unique to gas field operations will be emphasized.

*Presented by John Novack, Motor Carrier Enforcement Officer, Pennsylvania State Police
Ben Shields, Motor Carrier Enforcement Officer, Pennsylvania State Police*

PA State Police: Truck Inspection

During part two of this two-part breakout session, attendees will participate in an actual walk-around truck inspection performed by experienced field motor carrier inspectors. Attendees will have the opportunity to ask questions about how to operate in compliance with the applicable state and federal rules and regulations.

Presented by Pennsylvania State Police
