

# ABUNDANT, AFFORDABLE AND RELIABLE **NATURAL GAS**

Backed by independent research on air, water, and safety

## ABUNDANT

As the second largest producer in the nation, Pennsylvania accounts for nearly **20% of total U.S. natural gas production**. More than 100 years of supply lies underneath the Commonwealth.

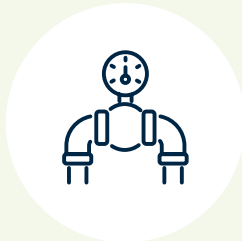

## AFFORDABLE

Pennsylvania consumers saved **\$8.8 Billion in 2025** alone thanks to Pennsylvania produced natural gas.

## RELIABLE

In-state production allows ready access to heat homes, schools and businesses, power electric generation plants, and fuel businesses. Pipelines have a **99.999% success rate** in safely transporting natural gas to end use consumers.

## ENHANCING THE ENVIRONMENT

Thanks to the use of natural gas for electric generation, key air emissions impacting respiratory health are **down over 90% since 2005**, while carbon dioxide emissions are **down 46%**.

## POWERING ELECTRICITY GENERATION AND HEATING HOMES AND BUSINESSES

As the third largest power producer in the nation, Pennsylvania generates **60% of its electricity** from natural gas. Over **8.8 million Pennsylvanians** utilize natural gas to heat their homes.

## DELIVERING ECONOMIC DEVELOPMENT

The natural gas industry supports over 120,000 family sustaining jobs, delivers over **\$40 Billion in economic activity** and supplies billions of dollars in economic impact to local communities each year.
